PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience building enterprise web applications, multi-tenant SaaS platforms, and predictive analytics solutions at HELM360. Experience in C#, ASP.NET Core MVC, Azure services, SQL-based data workflows, Python applications, hosted ML inference, and API integrations. Contributions span application development, cloud deployment, tenant onboarding, data mapping, exception handling, and business reporting.

TECHNICAL SKILLS

Backend & Web: C#, ASP.NET Core MVC, ASP.NET Web API, EF Core, REST APIs, JavaScript, HTML, CSS, Bootstrap, jQuery, AG Grid

Cloud & Delivery: Azure App Service, Azure Functions, Azure SQL, Azure Storage, Service Bus, Key Vault, Azure DevOps, CI/CD, Git

Databases & Analytics: SQL Server, Snowflake, T-SQL, stored procedures, data mapping, Power BI dashboard integration

AI/ML & Integration: Python, Flask, FastAPI, Azure Machine Learning Studio, model endpoints, predictive workflows, Smartsheet API, SharePoint API

PROFESSIONAL EXPERIENCE

HELM360 Analytics Pvt Ltd | **Noida, India** | June 2022 – Present

Software Engineer | 2025 – Present

Associate Software Engineer | 2022 – 2025

- Contribute to enterprise web and data products, combining ASP.NET Core applications, Azure integrations, database workflows, and customer-facing features.
- Develop application capabilities from requirements through implementation, testing, deployment support, and ongoing enhancements.
- Build integrations for data ingestion, exception handling, reporting, and model-backed prediction workflows.

SELECTED PROJECTS

TRANSITONE | Current Project | Multi-Tenant SaaS Platform

- Developed transit-agency registration, tenant onboarding, and user access workflows for a multi-tenant enterprise application.
- Implemented source-to-target data mapping, data review, insertion and exception-handling workflows supporting agency data processing.
- Worked on Azure cloud integrations, tenant-provisioning architecture and embedded dashboard experiences.

Tech: ASP.NET Core MVC, C#, EF Core, Azure App Service, Azure SQL, Azure Functions, Service Bus, Key Vault, Power BI.

CANOPUSPRIME | Predictive Analytics Platform

- Developed end-to-end machine learning models and exposed hosted prediction endpoints to web application workflows.
- Built workflows for predefined-model prediction and configurable data-source-driven model creation and inference.
- Integrated Flask web interfaces and FastAPI-based services with model-serving endpoints.

Tech: Python, Flask, FastAPI, Azure Machine Learning Studio, hosted inference APIs.

CAPMETRO DMA | Transit Data Management

- Developed application modules and C# business logic supporting transit data management operations.
- Updated business rules and integrated scheduled Azure Functions with Azure Storage processing workflows.

Tech: C#, ASP.NET Core, Snowflake, Azure Functions, Azure Storage.

KNOWLEDGE BASE HUB | Document & Issue Management

- Built CRUD workflows and database-driven AG Grid interfaces for document and issue management.
- Integrated Zoho issue tracking APIs and implemented document tagging, title search, and Python/Whoosh keyword search.

Tech: ASP.NET Core, SQL Server, JavaScript, Python, Whoosh, Zoho APIs.

LBWL | Smartsheet-to-SharePoint Integration

- Developed Python API integration to extract data from Smartsheet and populate SharePoint lists.
- Configured SharePoint list formatting for predefined business scenarios.

Tech: Python, Smartsheet API, SharePoint API.

CERTIFICATION & EDUCATION

Microsoft Certified: Azure Fundamentals (AZ-900) | October 2026

B.Tech, Computer Science and Engineering | Sanskar College of Engineering and Technology, 2022
